

Create a Vision for Your Information Systems Select Solutions with the Highest Return Reduce Implementation Risk

IMPROVE YOUR IT DECISIONS AND IMPLEMENTATIONS

Modern information technology solutions are like a huge puzzle. Applications, databases, networks and hardware need to fit together to support your business needs. IT solution vendors will assure you that their piece will meet your needs, but the reality is that all solutions have strengths and weaknesses—and they are not all created equal. Over time, business needs change, technology solutions change, the puzzle keeps getting more complex and the time to respond gets shorter.

Once the pieces of the IT puzzle have been selected, adding the difficulty of implementing these solutions presents a challenge that few small and medium-sized businesses are prepared to face alone. In addition, most companies can't afford to maintain a staff of IT professionals. Without the proper support implementation, risk increases and the price of failure can be costly.

At CMTC, we have the vision, the knowledge and the experience to help you select and implement the right IT pieces for your company. Our unbiased consultants help you make these complex decisions and keep your implementation on track and within budget. Our experience and objectivity will help focus your company's current and future efforts.

CMTC PROVIDES A PROVEN AND STRUCTURED APPROACH

Our consultants employ a proven and structured approach to answering critical IT questions:

QUESTION	APPROACH
How well are we addressing our current IT needs?	Fitness Check™ IT Assessment: A "health" diagnostic to identify improvements for your applications, infrastructure and organization.
What should our future IT systems look like?	Fitness Plan™ IT Planning: Business-driven planning that creates a vision for your information systems.
What solution should we select?	Best Fit™ Selection: A critical business requirements approach to selecting the system that best fits your needs.
How do we finish projects on time and on budget?	Fit™ Implementation Support: An approach to helping a company meet its responsibilities during an implementation.
Can we fix a system that isn't meeting our business requirements?	Retro Fit™ Reimplementation: A rapid approach for identifying and fixing gaps between systems and business processes.

IT MANAGEMENT SERVICES BENEFITS
