OFFICE OF MANUFACTURING AND ENERGY SUPPLY CHAINS

## Extended Product System Rebate Program

The Office of Manufacturing and Energy Supply Chains (MESC) is providing rebates to qualified entities that purchased & installed or newly incorporated an extended product system. Extended Product Systems (EPS) are industrial systems that are combinations of electric motors, electronic control, and driven load (e.g., pumps, fans, and compressors).

### Incentivizing the Clean Energy Transition

The rebate program aims to help reduce the cost of making energy efficient upgrades. The types of businesses that are most likely to benefit are ones with large motor and pump driven loads, especially ones that have no load control technology and equipment. These entities could include manufacturing facilities that use air compressors, fans, and pumps for industrial processes or commercial and multifamily buildings with large HVAC-related motors.

### Who is Eligible?

There are two distinct classes of eligible entities for the EPS program. The first includes entities that purchased a qualifying EPS and completed its installation between October 1, 2021, and September 30, 2023. The second includes owners

of equipment that was redesigned to newly incorporate an EPS if that upgrade was completed between January 1, 2021, and December 31, 2022. For both classes, the EPS must be installed within the United States or its territories and meet the technical and efficiency specifications. Potential applicants are strongly encouraged to review the program's full guidelines to determine their eligibility.

### How it Works

The total value of a rebate depends on the power rating of the EPS. The rebate is calculated by adding together the nameplate rated horsepower of the motor and the nameplate rated horsepower of the electronic control, then multiplying that sum by \$25. For example, if the motor has a nameplate rating of 7 horsepower and the electronic control has a nameplate rating of 10 horsepower, the rebate would be  $\$25 \times (10 + 7) = \$425$ . The total amount any single entity can receive across all rebates is capped, by statute, at \$25,000 per calendar year. MESC will solicit applications until funds are expended. Applicants should assume that rebates will be considered taxable income, and they will receive a 1099 Form.
