STEEL HOSE

RUBBER HOSE

**Aero Component Engineering** has been in the business of manufacturing Hydraulic Hose Assemblies and Fittings since 1964. We manufacture Formed, Convoluted, Teflon, Rubber and Metal Hoses along with Tube Assemblies.

In June 2008 we purchased and moved into a new state-of-the-art facility in Valencia, California.

Our **Quality Management System** conforms to **AS9100** and we are Rolls Royce and Northrop Grumman approved. Our products are **DFAR** and **ITAR** compliant.

We would appreciate the opportunity to be of assistance in any requirements you may have. If we don't have a drawing and you have the assembly, we can manufacture from that.

**Aero Component Engineering** is known for its competitive pricing and short lead times on small to large quantities. We hold a large inventory of New and New Surplus hardware, including Fittings and Couplings. We to hold a variety of common hose assemblies in stock for immediate delivery, contact us for a list and pricing.

**Aero Component Engineering** is a distributor for the complete line of **SAF-AIR** drain valves.

We have manufactured approximately **17,000 different hose assemblies**, those part numbers can be viewed at <http://aerocomponent.com/> Many of the hoses on the list are part of a series, so if you see something close to your requirement we can probably accommodate your needs.
