

# HEAVY DUTY

**(step 1)**

**(step 2)**

**(step 3)**

**(step 4)**

Large cords and cables are hard to manage and need a strong strap to contain their weight and size. Our Heavy Duty Straps do just that.

To use, place one end of the cable over the internal strap attachment (step 1) and affix the attachment around the cable (step 2). Coil the cord up and wrap the webbing around the cord, feeding the end through the metal D-rings (step 3) and pull the end of the strap to tighten (step 4).

## FEATURES

- Metal D-rings for quick adjustment and release
- Internal one wrap strap attachment
- Heavy-duty polypropylene webbing
- Ideal for industrial use
- Available in 3 sizes
- Contact us for custom options
