

CORD-LOX[®]

OPEN LOOP SERIES

(step 1)

(step 2)

(step 3)

The Open Loop model features a center section that is overlapping, but only sealed on one side. This allows it to be used on cables that have extra large plugs, such as jumper cables or audio “snakes”. Peel up the non-bonded side (step 1), and place the cord in position, pressing the flap firmly around the cord (step 2).

Then, coil the cord, wrap the Cord-lox around and secure it (step 3).

Even your most difficult or bulky cords can remain organized!

Custom colors, sizes and logo printing are available.
